

Viridis Energy Taps Highly Experienced Pellet and Forestry Industry Professional to Head Up Operations

Vancouver, BC – September 2, 2014 – Viridis Energy Inc. ("Viridis" or the "Company") (TSXV: VRD) (OTC: VRDSF), today announced that Tim Knoop has joined the Company as Senior Vice President of Operations. Mr. Knoop will oversee Viridis' Canadian West Coast and East Coast manufacturing operations with the goal to heighten cost efficiencies and fortify the Company's operational framework in preparation for its expansion strategy.

Mr. Knoop brings over 20 years of experience in the forestry industry and joins Viridis from Pacific Bioenergy, one of the largest pellet producers in British Columbia, where he served as general manager of operations, as well as director of Nazbec - a joint venture between Pacific BioEnergy and Nzko, a first nations logging company. He also served in senior management positions at Canadian Forest Products Ltd. (CanFor), the largest forestry company in Canada, where he managed continuous improvements strategies and oversaw quality control and optimization of its sawmill operations. In addition, Mr. Knoop spent several years at Skeena Cellulose Inc. where he supervised lumber operations and new product development. Mr. Knoop is an active contributor to industry organizations such as the Prince George Air Improvement Roundtable, the Wood Pellet Association of Canada, and the Northern BioEnergy Partnership. He holds a Bachelor of Science degree in resource management and a technical diploma in wood products engineering and manufacturing from the British Columbia Institute of Technology.

"Knoop's broad background in the timber and wood pellet industries is an important addition to Viridis management team, as we expand our production capabilities in order to satisfy the rapid increase in wood pellet demand. Knoop's operations management expertise, long successful track record, and industry relationships will reinforce our management team's efforts to expand our product offering capabilities and achieve profitability," commented Christopher Robertson, CEO of Viridis.

"Heading operations at this dynamic stage in the company's development is a great opportunity. Viridis is fast working to become one of the principle players in the rapidly growing global biomass industry. Viridis is uniquely positioned as the only player with manufacturing facilities on both coasts of Canada, providing a global reach. It is also one of the only public pure-play pellet companies in the industry with access to the capital markets, a growing track record of cost-effective acquisitions and successful integrations and, importantly, a corporate goal to add capacity in an industry with a highly favorable supply-demand imbalance," commented Tim Knoop.
